Journey of Dreams

# HOMEBOUND ADVENTURE

**GROUP A**  
**JULY 5<sup>TH</sup> TO 12<sup>TH</sup>**

**GROUP B**  
**AUGUST 2<sup>ND</sup> TO 9<sup>TH</sup>**

The background is a vibrant underwater scene. It features a sandy ocean floor in the foreground with various colorful coral reefs in shades of pink, orange, and purple. Numerous bubbles of different sizes float throughout the blue water. The lighting is bright and clear, creating a sense of depth and immersion.

**Journey** of Dreams

# HOMEBOUND ADVENTURE

## SYNOPSIS

It is Nemo's first day at school and Marlin is very nervous! Suddenly Nemo is caught in a net and taken away! But don't worry as her friends are here to save the day and get Nemo back home. It won't be easy though, as they must complete 3 challenges first. Will they know where to go? Will they pass all the challenges? Will Nemo be saved and go back home?

Let's find out in this Homebound Adventure! It is Nemo's first day at school and Marlin is very nervous! Suddenly Nemo is caught in a net and taken away! But don't worry as her friends are here to save the day and get Nemo back home. It won't be easy though, as they must complete three challenges first.

Will they know where to go? Will they pass all the challenges? Will Nemo be saved and go back home? Let's find out in this Homebound Adventure!

# A MESSAGE FROM STUDIO STARLIT

It has been a privilege to have our esteemed learners spending part of their Summer with us here at Studio Starlit. To the parents, our utmost gratitude for your amazing support to our programme.

Just like any other inquisitive minds these days, I am sure we have all been asking, "How will human evolve in this age of Artificial Intelligence?" Is this the next revolution after Scientific Revolution 500 years ago?

In his book: SAPIENS, Yuval Harari introduced 3 key revolutions experienced by us human, the homo sapiens:

1. Cognitive Revolution, 70,000 years ago
2. Agricultural Revolution, 10,000 years ago
3. Scientific Revolution, 500 years ago

70,000 years ago, we experienced the Cognitive Revolution. Central to this revolution is the ability to communicate in languages, which allows human to collectively believe in the same ideas and goals. Such collective belief enabled humans to cooperate on a much wider scale than any other species on Earth.

One key element that has not changed at each revolutions is the importance of communication and the use of language. In this AI age, the art of communication has become ever more critical for our generation. Making creative choices, thinking of new ideas, and approaching problems from a different and new perspective, which are essential traits in drama learning, are also critical traits of success in today's world. Other important real life traits that can also be learned from drama activities are: increased confidence, improved communication skills, development of empathy, enhanced teamwork, and a boost in cognitive abilities like critical thinking and memory.

No matter how many lines and what is the role, all cast members in a drama production need to work together. Every role complements each other, and every role is important. Similarly, in life, every individual is unique, everyone has their own strengths and shortcomings, and everyone can learn from each other.

We sincerely hope these 8 days experience of teamwork and communication will leave a long lasting mark in our learners' life skills development.

# DIRECTOR'S NOTE

It has been a pleasure teaching the students over the last 8 days and they have done a fantastic job. During the course they improved their speaking and acting skills as well as learnt the importance of teamwork. Furthermore, the students have been part of the story making process and were responsible for choosing what they do in certain parts of the story and in some cases added in new lines and ideas. We firmly believe that children learn best when they are allowed to be creative and have ownership over their work and it has been a pleasure seeing them work together.

The students have been polite and willing to try new things and very focused and attentive. The classes have been filled with laughter and games and we can't wait for them to show you the amazing show they have been working on. Finally, I would like to thank all the families for helping to practice with the students at home and supporting them!

We hope you enjoy the show!
